Support Wear

All day comfort ... practical, secure support

Support wear is a fairly new and growing accessory in the stoma care market. The benefits of wearing supportive garments are many fold, and becoming increasingly sought by nurses and ostomates alike. Comfizz were key players in creating this unique business niche in 2004

Comfizz mission ...

To continue developing innovative comfortable support garments in a shared effort with healthcare professionals and users.

We market a range of support wear that is virtually seamless, and as a result is ultra comfortable, soft and practical to wear that critically don't look 'medical'

Our motto "don't feel different... feel confident" encompasses our aim to help patients feel good about themselves and allows them to get on with life.

All about comfort

All about confidence

Benefits

Comfort at last... wherever the stoma is sited

- **Fits over stoma** without restricting flow due to high waist design
- **Incredible comfort**, no pressure marks from seams, soft fabric virtually seam free
- **Supportive** - gives light support all day long, when heavier support garments are too uncomfortable. Can be used with hernia
- **Total freedom of movement**, fits like a second skin due to ultra flexible fabric
- **Reduces Dragging Feeling** - supports weight of bag without restricting flow
- **Keeps skin cool, dry and comfortable** with breathable fabric

Waistband... A simple, sensible solution

- **Intimacy** - can be worn discretely during intimate moments
- **Changing Rooms** - conceals the stoma site when undressing in communal areas
- **Overnight** - Can hold the bag securely in place whilst sleeping
- **Swimming** - can be worn under regular swimwear for that extra layer of security
- **Body Shape** - smoothes lumps and bumps, improving body shape
- **Fashion** - low rise trousers no longer an issue with a waistband
- **Support** - provides light support comfortable enough to be worn day and night. Can be used with hernia.

All about comfort

The best quality

Thanks to strict quality control

All Comfizz products meet the highest quality standards and **comply with CE standards**. We only use the best materials and our products must regularly pass quality control procedures.

We are always looking to further develop our range, using, up to the minute fibres in order to be able to offer maximum benefits and comfort to our users.

Sound backup and support

We pay close attention to providing information and education about our products to patients, nurses and distributors. We meet patients face to face at support group meetings and open days as well as offering customer care over the phone. Educational presentations are frequently given to nurses and patients.

We liaise regularly with nurses to review garment features & benefits.

It is essential to help patients and nurses understand both the psychological and physical benefits of wearing Comfizz garments. Literature is available providing essential information about sizing, benefits, uses, styles etc

With distributors we provide all the technical information and backup necessary to promote the products and where applicable make them available on prescription. Distributors in return provide us with crucial information about social standards and practice in their countries. Our distributors are our eyes and our ears when it comes to meeting the demands of the local markets.

All about confidence

Constant innovation

Thanks to our knowledge and years of experience we are able to claim, that our current range of support garments are some of the best there is. Despite our market successes we are always looking for ways to make improvements in garment design, function or fabric properties. This is why we regularly consult health professionals and patients to keep up to speed and learn from people with hands on experience what can be improved.

Unlike some of our competitors we don't try to offer a large range of products. We specialize in our areas of expertise and so are able to be the best in what we do.
We always keep in mind **our goal ...**

**To make life as good as it can be,
no matter what the medical issue.**

All about comfort

Innovative medical and performance clothing

History

Back in 1998 Comfizz began as a fashion garment producer moving into specialist sportswear in 2002. We were providing high performance garments which were breathable and fit like a second skin to give ultra comfort and total freedom of movement for athletes.

Then in 2004 when a family member became an ostomate we worked together to use our expertise and access to high tech fabrics to produce the most comfortable, functional support wear.

Thanks to Comfizz origins in clothing and high performance garments we are in a very strong position to provide the best most innovative support wear. Knowing what athletes need and also what ostomates need we've been able to combine all our experience into the product range so that ostomates receive the elite benefits that athletes expect.

All about confidence

Don't feel different ... feel confident

This slogan is at the very core of what we believe in producing our garments for ostomates. When somebody has to live with a stoma they can often lack self confidence for a number of reasons, many relating to self image and fear of being different.

Comfizz garments are designed in collaboration with an ostomate who understands what it's like to live with a stoma. The garments provide a solid step towards regaining and holding onto self confidence after having a stoma.

The garments provide the highest possible level of comfort. They are modern and non medical looking. They provide gentle support of the abdominal region and stoma bag, which helps to improve bag adherence and thus reducing potential for leaks. All these benefits go some way towards helping the ostomate to feel less 'different' and more confident.

All about comfort

Our office

We are based in Yorkshire, England.
Comfizz Ltd, Birkin House, Haddlesey Rd, Birkin,
Knottingley, WF11 9LT, UK

From our headquarters we manage the worldwide distribution of our products.
Over the next few years we plan to gradually expand our market position and brand awareness in the international ostomy and continence market.

The symbol of originality and quality

The symbol reflects our company roots. It stems from the initials of the family member who became an ostomate and who then helped us create Comfizz support wear. Whenever you see this symbol be reassured it's a Comfizz original garment created with passion, commitment and a genuine understanding of the needs of an ostomate.

All about confidence
